

ASTIX-TAS DSE CALL LOG APP

How to install the app and validate

Introduction

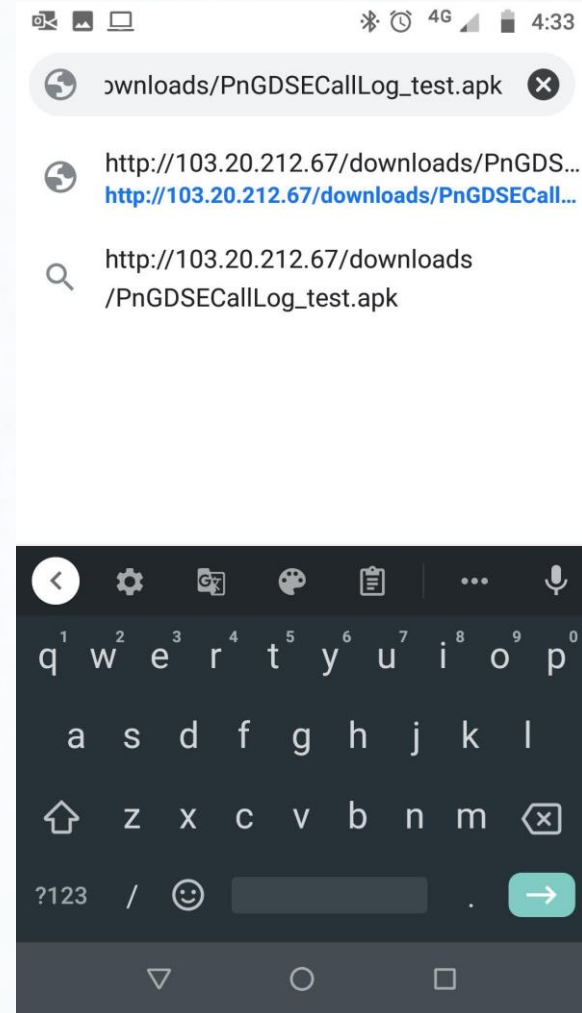

- **Purpose** – The purpose of this document is to describe how to download, install the app and to start the app by doing phone number based authentication.

1. Download the app

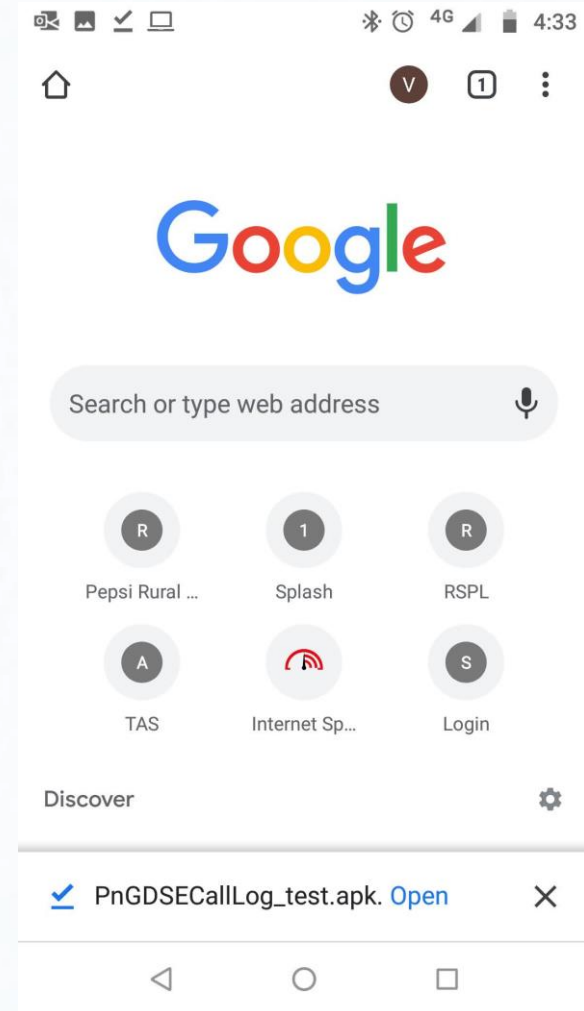

- App Download Link -
<http://103.20.212.67/downloads/PnGDSECallLog.apk>
- Copy above link to your phone browser address bar and press Enter button

1. Download the app

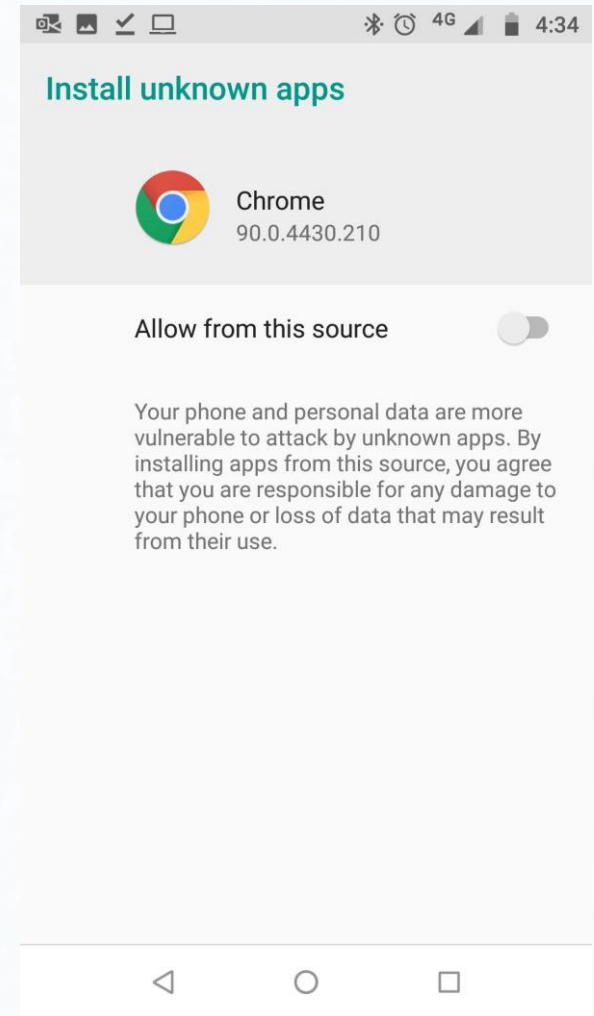

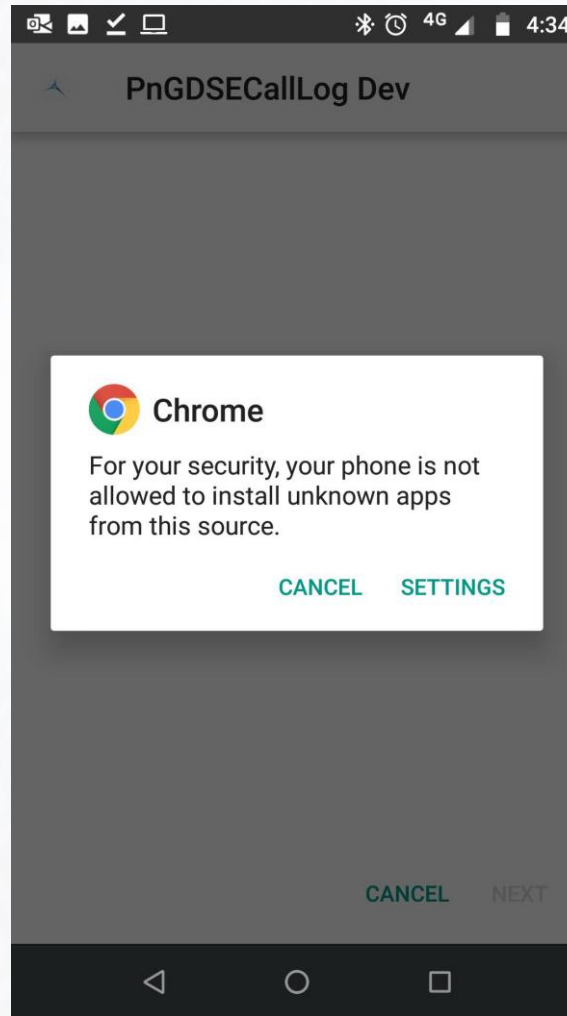

- After downloading, click on Open link.

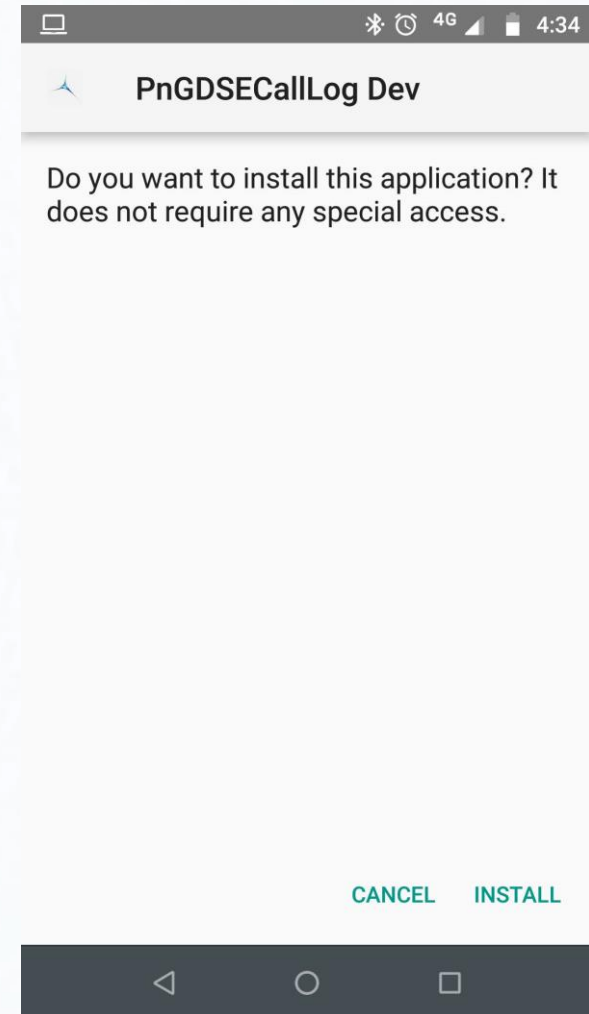

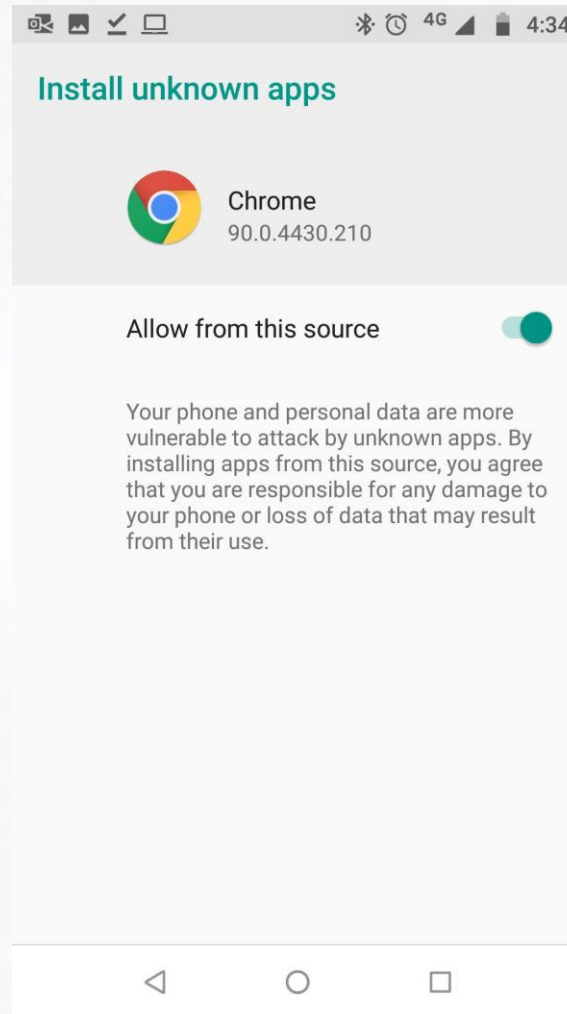

2. Install the app

- When you first time install this app then you will get message from phone to allow unknown sources installations.
- Click on Settings, and then switch ON *Allow from this source* option.

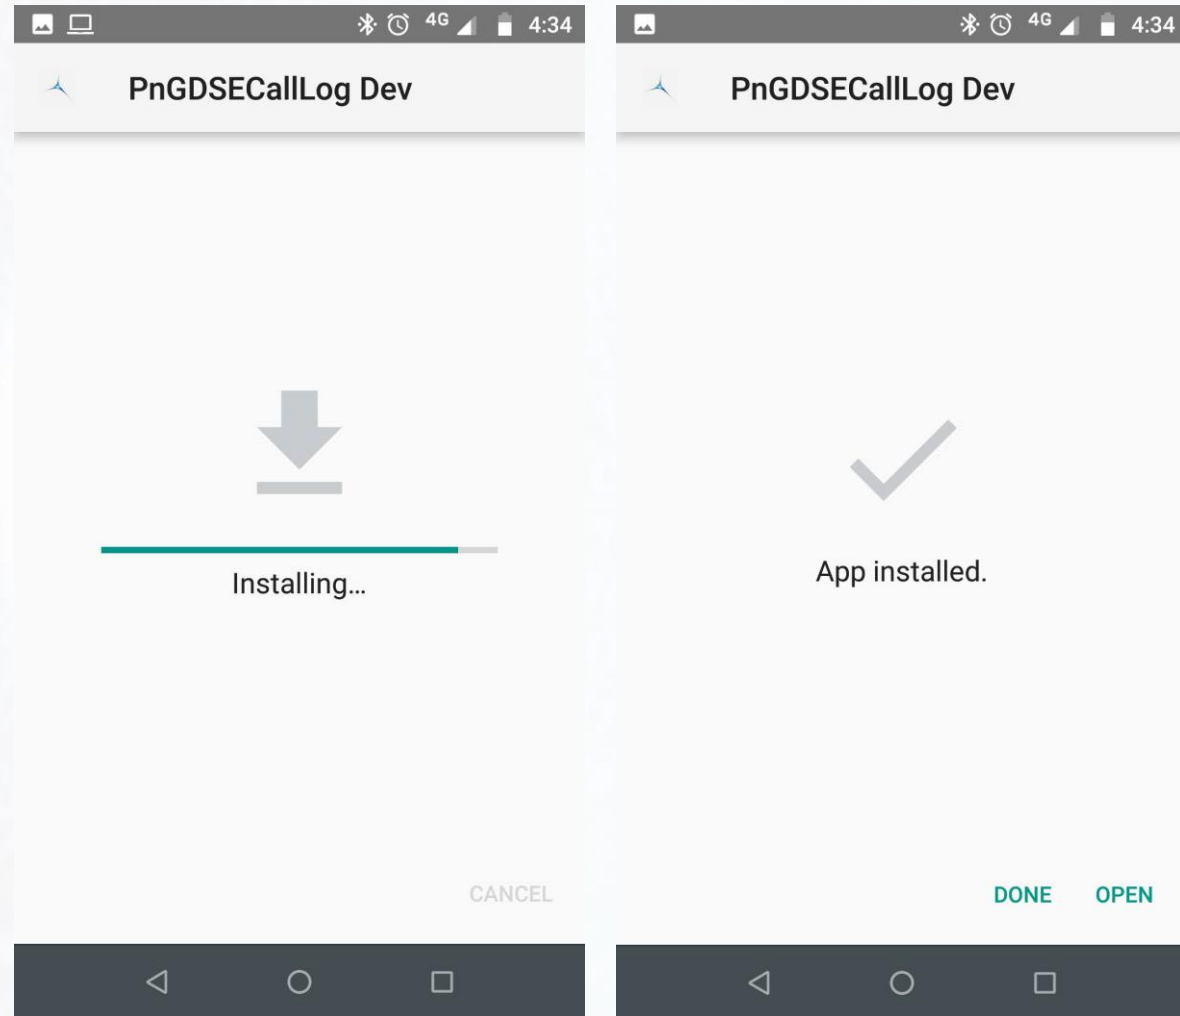

2. Install the app

- After allowing, you will reach on the installation screen and click on INSTALL button.

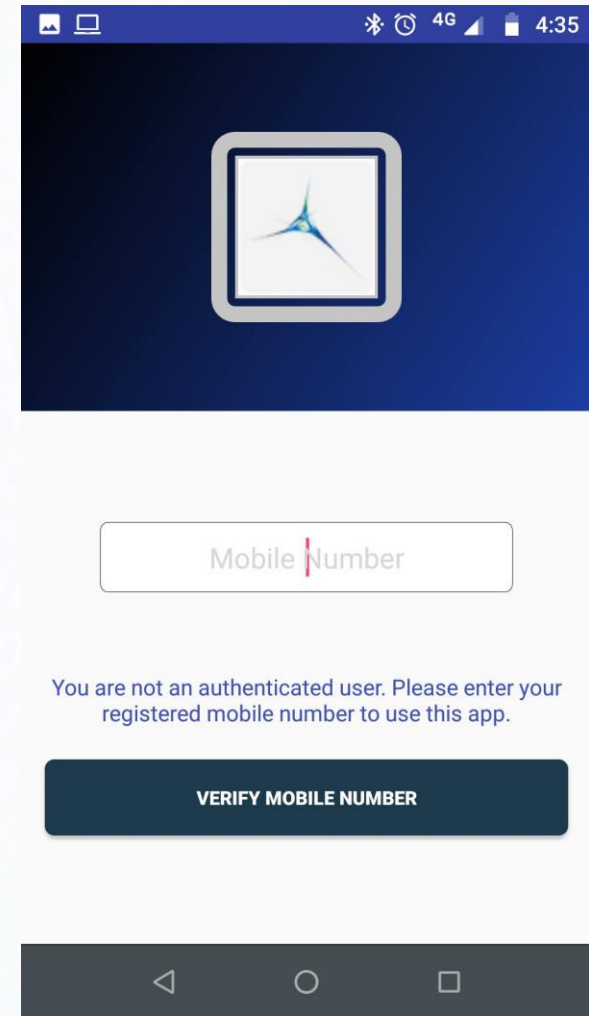

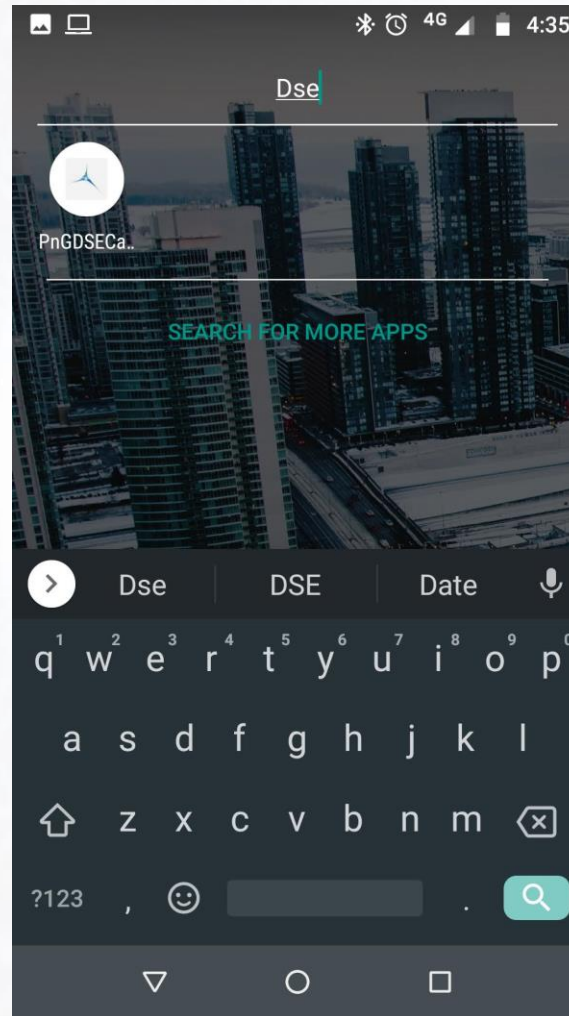

2. Install the app

- App will install and an icon of this app will create in the phone menus.

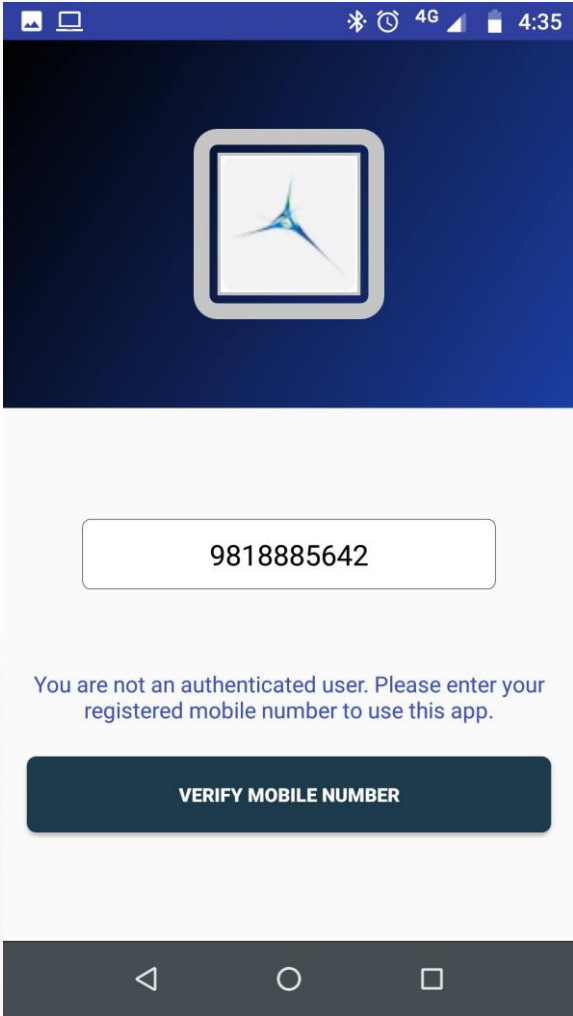

3. Verify Mobile Number

- Click on App Icon and app will ask you some permissions to allow without allowing those permissions you app will not work. So allow those required permissions and then you will reach on the phone number validation screen.

3. Verify Mobile Number

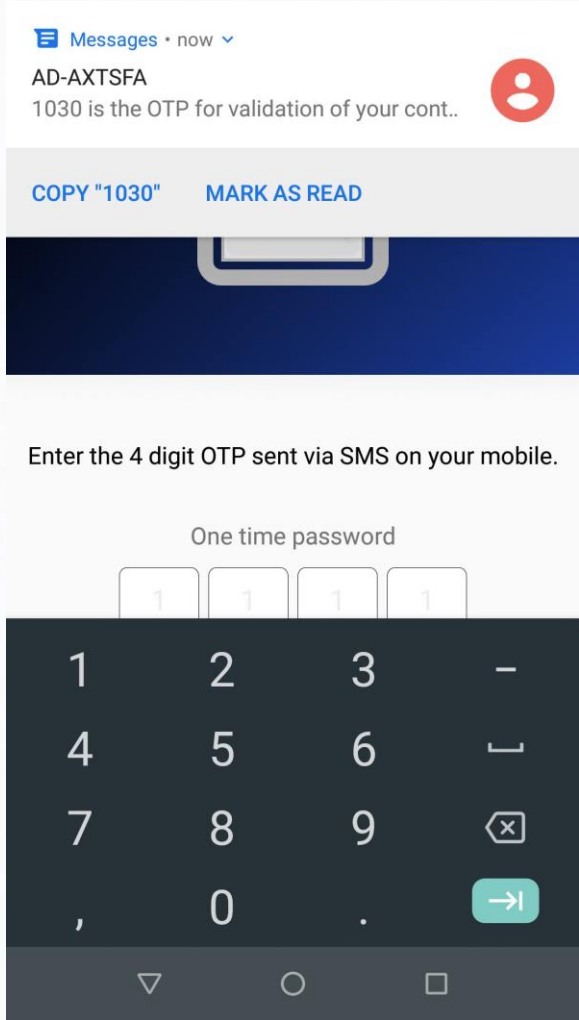

- Put your registered number in the given box and click on Verify Mobile Number button.
- You will get an OTP which will fill automatically in most phones but in case not filled then you can fill it yourself.

Details

Name : **SAGAR**

DSECode : **MS402**

Contact1 : 9818885642

Contact2 : 0

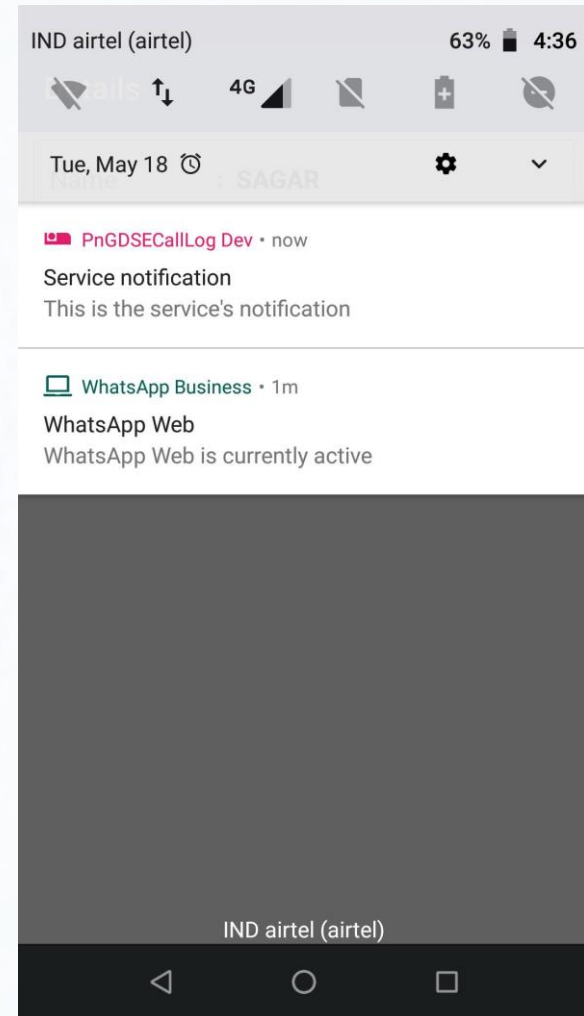

Distributor Name : D.B. DISTRIBUTORS

SUBMIT

4. App Started

- App will run in background and you can see a notification runs for background app.
- Please Note – no need to uninstall the app again and again. if you restart the phone then this app will again start when your phone started.
- In case on the portal report, person name showing in Orange color then just ask user to open the app once again and then close. Sometime android phone kills the background services of some apps.

Thank You
